

**To add a shortcut (aka alias) on your iPad home screen to go quickly to our website:**

1. Be sure you are looking at your home screen on your iPad
2. Tap Safari icon on your home screen
  - a. Picture of Safari icon

3. Type in the **Universal Resource Locator** for our website in the window at the top of this screen (picture below)
  - a. See “howtogeek” typing in the picture shown below
  - b. That is the window where you type the **URL** for our website
  - c. Our URL is <http://geratoday.com>
  - d. Type it into the horizontal space called a window

- e. Tap the SHARE icon (see what it looks like in above image)
- f. This will display icons shown above (Message/Mail/Twitter/Facebook/Bookmark/Add/Add/Copy etc)
- g. Tap + symbol (this is the add to home screen icon)

Your system will go back to your home screen and the new icon for the new shortcut will be there.

It should look like this icon shown here:
