

These are tips when printing with your iPad.

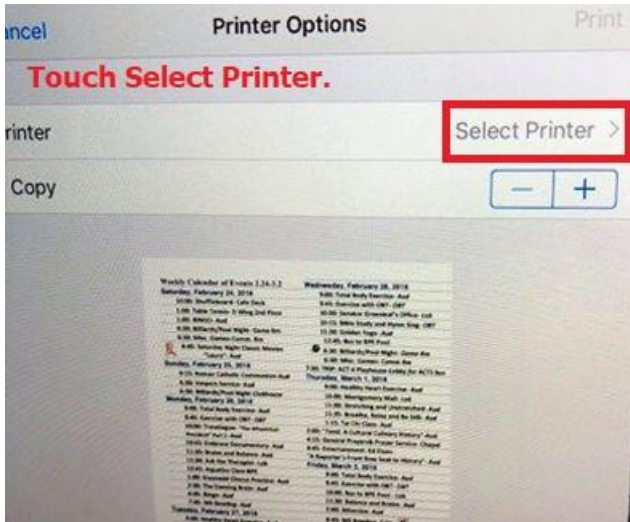

These are the screens that you will see if you want to print the weekly schedule from our website.

Next will be this screen. You have to find the print icon on this screen.

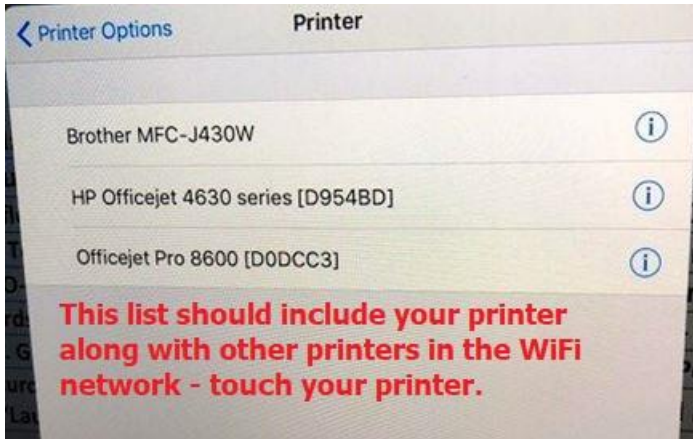

Next screen on your iPad will be this one. It lets you select a printer.

The next page shows you the last two screens you will use to print your document.

This is when you need to be very careful. You must be sure you select your printer. You could send your print job to some other person's printer if they also use the Acts WiFi.

Finally you are ready to print your document. You can see if you are using your printer. If you send the job to the computer room printer, you need to be sure it has paper and be ready to walk to the computer room. Select the number of copies you want. Decide if you want color or not. Lastly touch the print (see blue square area) in the upper right corner of the screen.
